

# Commercial Loans

## Commercial Loans

Structuring commercial loans requires an expertise that can only be achieved through years of experience. Often, mortgage brokers attempt to complete commercial transactions to the detriment of the client, with true commercial brokers honing their skills through training, a breadth of completed transactions and a full understanding of the business life cycle.

At MSM Commercial, a strong focus has been implemented to secure niche commercial lenders that provide solutions rather than road blocks.

Key areas of commercial funding:

- Commercial loans for SMEs including commercial property, factoring and leasing
- Rural lending structures
- Franchise lending facilities for both greenfield and established sites
- Development and syndication
- Private funding options available
